Front End Developer

WeSupport Incorporated | Contract

Nov 2023 - Nov 2024

- Develop features with unit tests while complying with IT security assessments and addressing required fixes.
- Develop marketing websites.
- Fix bugs and unresponsive designs.

TechEdge Solutions Inc | Full Time

Applications Developer

Apr 2023 - Nov 2023

- Develop web pages and components based on UI/UX designs in Figma using Next.js, SCSS, and Tailwind CSS, ensuring mobile responsiveness.
- Integrate backend APIs and third-party APIs, such as Stripe, for website functionality.
- Collaborate, assist and communicate with fellow frontend web developers, backend developers, UI/UX designers, QA analysts, and the project team.
- Develop mobile-responsive marketing sites with animations, transitions, and customized content.
- Lead the web frontend part of a project involving CMS, App, and Marketing.

Junior Consultant

Dec 2021 - Apr 2023

- Implement UI/UX designs from Figma and Adobe XD using Vue.js and Vuetify.
- Design a database and create RESTful APIs using Laravel and MySQL.
- Develop a dynamic content website using WordPress and customize its page styles.
- Collaborate and communicate with frontend web and mobile developers for API, UI/UX designer, and the project team.

Full-stack Web Developer

City of Malabon University | Contract

Feb 2021 - Dec 2021

- Design a database and create RESTful APIs using Laravel and MySQL.
- Implement UI/UX design and integrate APIs using Vue.js and Vuetify.
- Present and engage with respective users to identify necessary processes and improvements.
- Create a dynamic question and answer module with various types, timers, randomized choices, and tab-switching tracking.
- Generate statistics through query result export and Laravel API.
- Clean, organize, and create an automated function for initializing data through CSV import.
